Результаты Mape для случайных тестовых наборов

Ниже приведены значения MAPE при случайном выборе различных значений затравки, которые все меньше 0,065.

1.

```
> cat("The seed is: ", myseed , ". The value of mape is: " , mape , "\n")
The seed is:  123 . The value of mape is:  0.06320678
```

2.

```
>
> # 输出结果
> cat("The seed is: ", myseed , "and the value of mape is: " , mape , "\n")
The seed is:  100 and the value of mape is:  0.06028494
```

3.

```
> # 输出结果
> cat("The seed is: ", myseed , "and the value of mape is: " , mape , "\n")
The seed is:  66 and the value of mape is:  0.06055774
```

4.

```
> # 输出结果
> cat("The seed is: ", myseed , "and the value of mape is: " , mape , "\n")
The seed is:  500 and the value of mape is:  0.06193932
>
```

5.

```
> # 输出结果
> cat("The seed is: ", myseed , "and the value of mape is: " , mape , "\n")
The seed is:  3000 and the value of mape is:  0.05231064
>
```
